Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

This compendium of everything that's new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select what's safe, reliable, and fuel-frugal.

"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." — The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada ' s automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

## Download Free 2009 Pontiac G8 Gt Repair Manual

A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

Covers rear wheel drive 6-Cyl. and V8 gas engines. Does not include diesel engine or front wheel drive models.

Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. " Dr. Phil, " along with George Iny and the Editors of the Automobile Protection Association, pull no punches.

Celebrate 50 years of Pontiac's iconic muscle car. The early 1960s saw American auto manufacturers desperately trying to sell cars to the emerging baby-boom market. Pontiac attained success with its original muscle car, the GTO, but as successful as the GTO was, it was handily outsold by Ford's grand-slam home-run pony car, the Mustang. In response, Pontiac entered the pony car market in 1967, its new Firebird, a model that became one of the most iconic cars of the classic muscle-car era. Eventually the top Firebird model, the Trans Am, became the standard bearer for automotive performance in the U.S. market, kept the muscle car flame alive throughout the dark years of the 1970s and led the charge when performance reemerged in the 1980s. Pontiac Firebird: 50 Years chronicles the Firebird's rich history, from the early attempts to reach the youth market in the early 1960s, through the potent and turbulent years of the classic muscle car era, the resurgence of muscle in the 1980s, to the car's continued popularity today.

The history of Chrysler Corporation is, in many ways, a history of a company floundering from one financial crisis to the next. While that has given shareholders fits for nearly a century, it has also motivated the Pentastar company to create some of the most outrageous, and collectible, cars ever built in the United States. From the moment Chrysler unleashed the Firepower hemi V-8 engine on the world for the 1951 model year, they had been cranking out the most powerful engines on the market. Because the company pioneered the use of lightweight unibody technology, it had the stiffest, lightest bodies in which to put those most powerful engines, and that is the basic muscle-car formula: add one powerful engine to one light car. When the muscle car era exploded onto the scene, Chrysler unleashed the mighty Mopar muscle cars, the Dodges and Plymouths that defined the era. Fabled nameplates like Charger, Road Runner, Super Bee, 'Cuda, and Challenger defined the era and rank among the most valuable collector cars ever produced by an American automaker. Featuring cars from the incomparable Brothers' Collection, The Art of Mopar: Chrysler, Dodge, and Plymouth Muscle Cars celebrates these cars in studio portraits using the light-painting process perfected by Tom Loeser. It is the ultimate portrayal of the ultimate muscle cars.
