Battle Axe Blenheims 105 Squadron 1940 41 Aviation

No. 105 Squadron was a flying squadron of the Royal Air Force, active for three periods between 1917 and 1969. It was originally established during the First World War as a squadron of the Royal Flying Corps and disbanded after the war. Reactivated shortly before the Second World War, it was inactive again after the conflict. During its second existence it was a bomber unit and had the distinction to be the first to operate the de Havilland Mosquito light bomber. During the 1960s it was reactiva

Battle-Axe Blenheims ⓘ No 105 Squadron RAF at War 1940-1 ...

Battle-Axe Blenheims. Of the thousands of aircrew who served in RAF Bomber Command during the Second World War, those who flew Bristol Blenheim medium bombers with No 2 Group on daylight raids would say they had the toughest job of all. Battle-Axe Blenheims is the true story of the men of one such Blenheim squadron, No 105, who fought bravely in the first years of the war despite overwhelming odds.

I came across the anecdote in Stuart R. Scott's 1996 book: Battleaxe Blenheims ⓘ 105 squadron RAF at war 1940-1 * In Chapter 13 (P.122) he writes about the life on Malta where 105 Sdn were stationed in the early part of the war. The airfield was at Luqa where the airport is now.

Malta Mystery | Mechtraveller

This attack is well remembered and described in Battle Axe Blenheims, the unit history of the squadron, where the target is described as a ⓘSqualer !, a radio-equipped early warning vessel that acts as spotter for the the defenses on Sicily. Four ships had gone out that day, led by Squadron Leader Duncan, the others commanded by Sgts.

Malta Mystery | Mechtraveller

Originally published in 1996 and now available in paperback, a history of Blenheim squadron No.105 which examines their low-level, daylight bombing operations from bases in Norfolk and Malta, between 1940 and 1941.

The sequel to Battle-axe Blenheims, this is the true account of the heroic exploits of a famous bomber squadron between 1942 and 1945, taking up where the first book left off. No.105 Squadron was the first RAF bomber squadron to fly the de Havilland Mosquito. The book looks firstly at the squadron's operations pioneering low-level and shallow dive attacks on enemy targets. In the face of deadly anti-aircraft fire, these operations resulted in a high casualty rate, with many awards for bravery handed out to aircrews.

 ⓘOne of Britain's best-known aviation historians . . . provide[s] a moving and exciting account of the light bombers raids by No. 2 Group. ⓘ!Firetrench This is the story of 2 Group RAF during World War II. Much of it is told by the men who flew the Blenheim, Boston, Mitchell and Mosquito aircraft that carried out many daring daylight and night-time raids on vitally important targets in Nazi occupied Europe and Germany. These were not the famous thousand bomber raids that hit the wartime headlines, but low-level, fast-moving surprise raids flown by small formations of fleet-footed and skillfully piloted twin-engine light bombers. Their targets were usually difficult to locate and heavily defended because of their strategic importance to the Nazis. 2 Group also played a vital part in the invasion of Europe both before and after D-Day. Often they would fly at wave-top height across the English Channel or North Sea to avoid detection and then hedge-hop deep into enemy territory to deliver their precision attack. Enemy fighters and anti-aircraft fire were a constant risk. This is a remarkable story of skill and bravery by a little-known branch of the RAF. !The most known modern air war historian . . . has made his usual traditionally meticulous and well-researched work. Through combination of first-hand accounts and document sources he describes the exploits of British, Commonwealth and Allied twin-engine bomber crews who fought and won their own war in Europe's sky bravely and regardless its cost. !Mykhaylo Akimov !If you are interested in British aviation history, then this book would make a good addition to any collection. !Armorama

This is the epic story of Escape and Evasion during World War Two. Main character is Donald Kenyon Willis, an American pilot who fought with the Fins against the Russians in 1940, then joined the Norwegian Naval Air Arm against the Germans, escaped to the Shetlands, joined the RAF as one of the first Eagle Squadron pilots, until he joined the USAAF. After the war and a spell as a base commander in Austria and Germany he became a test pilot in JATO (Jet Assisted Take-Off) experiments from Wright-Patterson Air Base in Ohio, USA. He was one of the last five airmen to evade capture via de Pyrenees, the night before D-Day with American Lieutenant-Colonel Thomas H. Hubbard and 2nd Lieutenant Jack Cornett and Britons Pilot Officer Len Barnes and Sergeant Ron Emery. JOURNEY TO THE HORIZON tells the story of three fighter pilots and two Lancaster crews who were shot down by the Germans. It follows them on the run, hiding, in captivity and in some cases in death. They were Britons, Canadians, New Zealanders and Americans. Five of them met in Paris while being guided by members of the Comete Escape line, others evaded in different ways. Some endured the harsh life in a POW-camp, while in one case an airman even ended up in Buchenwald concentration camp. Those who died now rest at various cemeteries in France. In the book Onderwater and Lisette also tell about the sometimes dreadful experiences of the fellow crew members of Barnes and Emery after their two Lancasters crashed in France. In the course of the research Hans Onderwater followed the same evasion route, meeting the helpers who risked their lives, crossed the Pyrenees on foot with the Basque guide of 1944 until he too reached Gibraltar. He visited Stalag Luft 1 Barth on the Baltic coast and Stalag Luft 9 Sagan in Poland, Buchenwald near Weimar and Ravenbruck near Berlin. He spoke with the five airmen or their families and corresponded with the others. During the last forty years he interviewed over 100 people who were in some major or minor way connected to the airmen and their experiences.

In the Second World War, Malta was besieged for nearly two and a half years, during which time a decisive air war was waged between Britain, Italy and Germany.This is part of that story, from the early days in June 1940, when only a few Gladiator biplanes were available to combat Italian bombers and fighters, to the intervention of the Luftwaffe and the tenuous defense by outclassed Hurricanes, culminating in the desperate months of fighting following the arrival on Malta of the Spitfire in March 1942.What became of the many aircraft destroyed over the Maltese Islands, and what was the fate of their pilots and crews?More than a thousand aircraft were lost. Many crashed into the Mediterranean; others came down on Malta and the neighboring island of Gozo. This book focuses on the latter some 200 British, Italian and German machines, and the fate of their pilots and crews. It reveals where those airplanes fell, thus providing a record that will continue to be valued by future generations.This comprehensive volume documents all known aircraft crash sites in and around the Maltese Islands and provides the circumstances of each loss are related in detail with accounts from both sides.In Germany especially there are many still unaware of the fate of family members who never returned after the Second World War. This book reveals what happened to some who even today are still officially listed as missing.

The introduction of Italy into the Second World War on 10 June 1940 signalled the start of the siege of Malta, and for the next two and a half years the Axis powers did all they could to batter the small island into submission. Malta's defences were initially verging on non-existent but the British Prime Minister, Winston Churchill, could not give up on the island. Laying at the crossroads of the Mediterranean, where the supply route between Italy and the Axis armies in Libya crossed the Allied sea route between Gibraltar and Alexandria, almost exactly at its mid-point, Malta was strategically too important and held the key to the door of the desert war being fought in North Africa.If Malta could be held then it would allow British forces to maintain an offensive capability in the Mediterranean and prevent Axis supplies from reaching North Africa. But everything needed to fight a campaign people, food, fuel, ammunition, medical stores, aircraft and spares would have to be delivered to Malta in sufficient numbers and on a regular basis. It would take a monumental air and maritime effort just to survive, let alone hit back, and to manage both would require those in command to carefully balance Malta's precious and limited resources. Otherwise, it meant surrender and who knows what the outcome of the Second World War might have been had the island fallen. Here, the accomplished military author Peter Jacobs tells the extraordinary story of the heroic defence and re-supply of the Fortress Island of Malta during the longest siege in British history.Links End Links Author

As part of the Aviation Heritage Trail series, this book covers airfields in Lincolnshire, Norfolk, Yorkshire and Northamptonshire. 12 Group was formed in 1937 within Fighter Command to become responsible for aerial defense of the industrial Midlands. During World War Two this group was the second most important fighter group and as such, it received it's fair share of attacks from the German Luftwaffe throughout the war. As well as regional defense, 12 Group were also supposed to fly cover for 11 Group airfields during the Battle of Britain. The airfields and other places of interest include Digby, Hibaldstow, Kirton on Lindsey, Coltishall, Mattsk, Swanton Morley, Catterick, Church Fenton, Clifton, Hutton Cranswick and WitteringThis book looks at the history and personalities associated with each base, what remains today and explores the favorite local wartime haunts. Museums and places that are relevant will also be described and general directions on how to get them included.

The Second World War saw a host of heroic raids enacted across the various theatres, all delivered valiantly in a variety of ways by British combatants; on land, by sea and from the air. Daring exploits such as the raid on Rommel, the endeavours of the Cockleshell Heroes and the Dam Busters have become legendary in the annals of warfare. All feature here, alongside details of fascinating lesser-known operations.It goes without saying that not all the raids were a success; in fact, some went disastrously wrong but the men who carried them out did so with extreme courage and in the knowledge that they might not return. Here, Peter Jacobs tells the gripping stories of some of the most heroic raids of the entire conflict. These include the disastrous landings at Dieppe; the amphibious assault on the dry dock at St Nazaire (more Victoria Crosses were won during this raid than in any other operation of the war); the airborne assaults on the German radar installation at Bruneval and later on Pegasus Bridge as a prelude to D-Day; and the low-level raid by RAF Mosquitos on the prison at Amiens to release members of the French Resistance.This is an intriguing and insightful historical record of thirty of the most daring and strategic raids of military history and is sure to appeal to all enthusiasts of the genre.

Looks at the design, development, and history of the Blenheim bomber.

RAF Bomber Command in Fact, Film and Fiction is a bibliographical and media guide to the exploits of the command between 1939-1945 setting on record much of what has been written, filmed or sound recorded in the English language
